Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Lockwood s Dictionary of Terms Used in the Practice of Mechanical Engineering In this little book I propose to offer to the Draughtsman, Pattern-maker, Moulder, Smith, Boiler-maker, Fitter, Turner, Erector, and Engineer s Storekeeper a ready means of obtaining or verifying the meaning of terms in use in other departments than his own, and which, owing to the ever-widening gulf which separates one class of workmen from the rest, are seldom familiar to those outside of that particular department in which the terms are in use. I venture to think that the engineer s pupil beginning his practical studies, and the amateur worker, neither of whom can possibly know the sense of many of the terms which they meet with in their technical books and journals, will also find it profitable to turn to a book of this character for definite information thereupon. My claim to the possession of the special knowledge necessary for this task is, that I have been in the factory, engaged in practical duties, during all my working life of twenty-seven years. The drawing office, pattern-shop, foundry, fitting, turning, smith s, and boiler-shops are familiar to me in my capacity as foreman; therefore I have drawn in this work on the experiences of my daily life, coupled with some necessary amount of self-culture. I have endeavoured to discard all fanciful and unusual terms coined by individual workmen, or which are only current in a single shop or district, and to give only those which are of universal, or of moderately wide application.
