The CPS After the Redesign: Refocusing the Economic Lens

By STEPHEN M. MILLER

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 52 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. The Current Population Survey (CPS), a national survey of 60,000 households, is a major source of information about the American labor market. In January 1994, the CPS underwent a major redesign both in the wording of the questionnaire and the methodology used to collect the data. The objective of the redesign was to improve the quality and expand the quantity of available data. However, the redesign also caused changes in the measurement of many of the estimates derived from the CPS. To assess the effect of the redesign a parallel survey was conducted in two phases. During the first phase, data were collected using the revised questionnaire and collection methodology. In the second phase of the parallel survey, data were collected using the unrevised questionnaire and procedures. Using monthly data from the parallel survey and the CPS conducted during the same time period, this paper estimates adjustment factors for various aggregate measures derived from the CPS in order to permit comparisons of estimates before and after the redesign. The adjustment factors are estimated using a main effects linear model and...
