

Partners in Freedom: Contributions of the Langley Research Center to U.S. Military Aircraft of the 1990 s (Paperback)

By National Aeronautics and Administration, Joseph R
Chambers

Createspace, United States, 2013. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.For over 80 years, Langley Research Center has exemplified the cutting edge of world class aeronautics research for civil and military aircraft. Established in 1917 as the nation s first civil aeronautics research laboratory under the charter of the National Advisory Committee for Aeronautics (NACA), Langley initially existed as a small, highly productive laboratory with emphasis on solving the problems of flight for the military and the civil aviation industry. During World War II (WWII), the Langley Memorial Aeronautical Laboratory directed virtually all of its workforce and facilities to research for military aircraft. Following WWII, a more balanced program of military and civil projects was undertaken. The emergence of the Space Age and the incorporation of the NACA and Langley into the new National Aeronautics and Space Administration (NASA) led to a rapid growth of space related research and the cultural change of the old laboratory into a major research center. Today, Langley research efforts encompass critical areas of both aeronautics and space technology. Throughout its history, Langley has maintained a close working partnership with the Department of...
