The present research had progressed but little before it became apparent that its scope was so comprehensive, and involved so many unsettled problems in physiology, that a clearly satisfactory termination could not be hoped for. The aim has been to obtain graphic data furnished in the performance of various surgical operations or by the infliction of different injuries. For the sake of clearness certain hypotheses have been advanced in a part of the research, with the understanding that they are subject to future change. In the main I have aimed to obtain the results bearing on the subject, without always assuming to be able to explain the mechanism of their production. The magnitude of the subject and the great number of unsolved questions of...
